

You may choose to have your wedding recorded onto Video or DVD and you can either have all Video or all DVD or even a mixture of both, we aim to give you the best.

To Finish

We achieve maximum clarity by using state of the art digital equipment to record the days events and to edit your film, this gives a professional finish which is our main aim to you the customer, with tasteful effects, expert editing and music of your choice and to finish a full credit list so nobody is missed out.

Your Wedding DVD / Video

Our Services Include

An initial consultation so that we can design and produce the film of your dreams to capture the moments of your special day.

We make every effort to film as unobtrusive and inconspicuously as possible to enhance your enjoyment of the day and to capture the true days events.

Why Do I Need A Wedding Video?

Your wedding day is the most important day in your life and you want to remember it for all time, Photos are nice to look back at but a video captures the sights and sounds and atmosphere of the day.

How much does it cost ?

We do not have different wedding video packages, where you have to choose what one you want, we have the main package which takes in the whole of the days events up to and including the first dance and then there are optional extras if you require them like filming the evening reception.
Please ask for prices.

How Do I Book ?

Its simple just give us a ring and let us know the date of the wedding, if we are free we can provisionally book the date for you.

We will send you a booking form for you to fill in, once you have filled in with all the details and sent it back to us with a £100 non refundable deposit, you are booked, we will then take care of everything for you.

We will liaise with the church or registry office, talk to the reception venue and take care of the video license which is required to film the wedding.

Plus any other arrangements that need to be taken care of, just leave everything to us.

What Do I Get For My Money ?
